

Internship - Immerse in Emerging Markets and Technologies

Your internship opportunity in Phnom Penh, Cambodia

Cambodia Academy of Digital Technologies (CADT) - Driving Digital Innovation in Cambodia

The Cambodia Academy of Digital Technology (CADT) offers students the opportunity to dive into the Cambodian digital ecosystem and to be part of its core mission to develop digital talent and to drive innovation. When you are interested in technology, startups and business development, then join our academy and be part of our mission. We offer you an open, creative and innovative oriented environment for your personal career development in South East Asia.

Who we are and what we do

CADT is a national flagship research and education institution for Digital Technology and Innovation, nurturing digital talent and innovators to drive Cambodia toward a digital society. The Academy consists of three institutes on one campus, the institute of digital governance, the institute of digital research and innovation as well as the institute of digital technology. Our campus hosts our state of the art innovation center, the newly built tech center and one of the best tech universities in Cambodia.

The Institute of Digital Research and Innovation is the first of its kind research institute in Cambodia to conduct R&D in digital technology as well as to drive digital innovation and entrepreneurship in Cambodia. The institute consists of the Digital Innovation Center, the Digital Research and Development Center - focusing on research in AI, data science, robotics, NLP, Cybersecurity and IoT, and the Digital Policy Think Tank.

Your experience with us

As an intern you will mainly support the Digital Innovation Center to spark strategic partnerships between academia and industry, connecting students to digital careers, supporting running an incubator and accelerator program that aligns startups to investors and other collaborators they might not otherwise encounter. You will also get the chance to connect with the researchers, the e-governance institute as well as our e-commerce, computer science and networking students on the campus. The specific tasks and focus of your internship can be openly discussed with us, considering your skills and future pathways.

During your internship with us, you will gain exciting insights into the work of one leading innovation and digital research institute. Take this chance, to:

- Enhance your professional skills and develop exciting activities for startups, SMEs and students in the field of digital innovation and research
- Collect professional and intercultural experience in a foreign country
- Get insights into emerging technology research such as AI, robotics, IoT and NLP
- Build international contacts and establish a global network
- Improve your soft skills and learn how to organize impressive events and workshops
- Learn professional communication and strategizing

Of course, we will gladly provide you with an internship certificate. Internships with us are compensated with an expense allowance of **300 USD per month**.

What are your qualifications?

- You study Computer Science, Business Administration or another related BA or MA relevant for or work
- Our working language is English. Excellent writing, speaking and reading skills are a must have.
- You should already be advanced in your studies (at least 4th semester of undergraduate studies)
- Skills in design and layouting programs are a plus
- Skills in web development (backend frontend are a plus)
- Basic digital literacy is a must have
- You have a pronounced willingness to learn and are also willing to engage in topics that are new to you
- Previous work experience is a plus, but not an exclusion criterion
- Applicants should have Khmer or German citizenship

With our internship program you will be with us for **at least three months**, possibly longer.

Applications are accepted throughout the whole year.
