YUKKA Lab AG is looking for annotators/knowledge engineers (student/freelancer) to join our Data & Resources Team.

About Us
We are a fast-growing FinTech and hiring talented engineers with a broad understanding of technology, and visionary and creative thinking for thrilling development tasks. We are unique in sentiment analysis by screening professional print and media content. Our focus is the financial market but we are enlarging our products for overall market sentiment detection.
We understand the value of data. Our software analyses online and print news and derives market sentiments. We analyze sectors, indexes, and securities all over the financial markets.

Responsibilities:
Annotation of data with linguistic information
Development of language resources, such as lexica, gazetteers
Development of knowledge bases/ontologies

We are looking for the following language combinations:
German/English
Arabic/English
Russian/English

Requirements:
Student in linguistics, philology, or translation
Good understanding of language analysis, e.g. part-of-speech, morphology, syntax, semantics
Native (for native-like) fluency in Russian, Arabic, or German
Excellent English skills
Creativity and motivation to push product development
Technically-minded
Ability to research and collect information from a wide variety of resources
Interest in information extraction

Nice to have:
Experience with creating ontologies, knowledge graphs
Knowledge of additional languages

We offer:
Flexibility / Hybrid
Work-life balance
Regular events
Start-Up Flair
Drinks / Fruit
Headquarters in the heart of Berlin
Bikini House Discount 10%-15%

You believe that you would be a good fit for YUKKA Lab? Great!

Please send your application with a possible start date to Katarzyna Marszalek-Kowalewska (kmk@yukkalab.com).
