Competencies	In keeping with the CEFR for B2 language proficiency, students should be able to understand the main content of complex texts on specific and abstract topics and to comprehend expert discourse in their chosen field of speciality. They should be able to communicate spontaneously and fluently so that a normal conversation with a native speaker runs relatively smoothly for both communicative partners. Finally, students should able to discuss a wide range of topics clearly and in detail, discussing opinions on a current topical issue and stating the relevant advantages and disadvantages. French and Spanish: In keeping with the CEFR for B1 language proficiency, students should be able to broadly comprehend written and spoken communication where clear, standard language is used to discuss familiar matters from work, school, leisure etc. They should be able to overcome most situations which occur when travelling in the area where the relevant foreign language is spoken. They should also be able to discuss familiar topics and personal interests clearly and coherently. Finally, students should be able to report on experiences and events, describe their dreams, hopes and aims, and give brief reasons or explanations for their opinions and plans.								abstract eciality. eat a both de opical d be eclear, ool, ecur ken. ests give

Assessment Remarks	The assessment is split into two parts which are combined for the course grade for the module: • a group presentation on a chosen project; • a written test in the examination period. 3 ECTS and a grade will be given if both parts have been completed with a minimum grade of 4 (satisfactory). These assessments make up 50% of the overall module grade, each accounting for 25%. As the grade for this course is given as a overall partial grade for the module, students needing to retake the course must complete the whole course assessment again and cannot retake a part thereof.

This includes the ability to resolve issues orally and in writing in the foreign language as well as, amongst other skills, independently writing job applications and planing finances. Following completion of their semester abroad, students should be able to live autonomously in the relevant foreign country and plan their daily activities, using the linguistic and intercultural competencies acquired in their studies. The students should come into close contact with a foreign culture and utilise and develop their foreign language skills in specific communicative situations. They should be able to analyse various everyday, academic and professional situations in a culture-specific manner, and communicate adequately in the foreign language. Students should therefore be well prepared for a later professional career in the field of multilingual communication as well as for writing a foreign-language or multilingual dissertation.

Competencies	By the end of this course, students should have gained an insight into two of three areas of interpreting. They should be able to prove basic knowledge of the requirements and conditions of conference interpreting and/or public service interpreting, and complete simple interpreting tasks. They should be able to reflect critically upon their role in different settings. Depending on their chosen courses, students should also be able to orally reproduce a written source text in one language into another language, thereby developing the oral and written language usage and language transfer skills required to be able to comprehensively evaluate and successfully complete given translation tasks in various settings.
